IT Project Manager | PMO Project Analyst | AI-Enabled PM

PROFESSIONAL SUMMARY

IT Project Manager with 4.5 years at TE Connectivity and a genuine obsession with making projects run smarter. Progressed from BI Analyst to owning 13+ concurrent global projects across engineering, quality, finance, and AI, all delivered on time, on budget, and with full PMO documentation hygiene. What sets me apart: I use AI every single day. I prompt Claude to stress-test project risks, automate status reporting, build UI mockups for stakeholder reviews, and create presentation decks in minutes using Gamma.ai. I also built an AI-powered application during a company Codeathon that was adopted company-wide. AI is not a trend to me. It is wired into how I plan, communicate, and deliver.

CORE COMPETENCIES

Project Management: PMO Governance, Project Scheduling, Status Reporting, Risk Management, Change Management, Resource Management, Budget Tracking, Agile, Waterfall, Hybrid, SDLC

Tools: Jira, Confluence, Azure DevOps, MS Office, Power BI, Tableau, SQL, Excel

AI Stack: Claude (daily), ChatGPT, Gamma.ai, Prompt Engineering, Reverse Prompting, Prompt Chaining, Vibe Coding, AI-powered application development, UI Mockup generation

Soft Skills: Stakeholder Engagement, Cross-functional Collaboration, Executive Communication, Presentation Skills

Certifications: CAPM (Above Target Score, June 2025), Google Project Management, Tableau Data Analyst

AI IN PRACTICE

- Use Claude daily to analyze project schedules and prompt for potential risk scenarios before they surface, giving Program Managers early warning with framed recommendations rather than raw flags.
- Apply reverse prompting techniques to extract clearer business requirements from stakeholders, feeding their vague inputs back through structured prompts to surface assumptions, gaps, and unstated constraints.
- Build UI mockups using AI tools to speed up stakeholder alignment on new project deliverables, cutting back-and-forth review cycles before development begins.
- Generate stakeholder-ready presentation decks using Gamma.ai in a fraction of the time, freeing up focus for content quality over slide formatting.
- Built 'Code Health Monitor' using Claude and vibe coding during a company Codeathon; the application was selected and adopted across active projects to track code quality in real time.

PROFESSIONAL EXPERIENCE

IT Project Manager | *TE Connectivity, Bengaluru, India*

Nov 2023 - Present

- Manage 13+ concurrent global IT projects valued at \$1.3M across engineering, quality, finance, and AI domains under PMO governance; own project plans, schedules, budgets, and resource allocations from initiation through closure.
- Prepare weekly project status reports and executive dashboards in Power BI; improved reporting efficiency by 40% by standardizing tracking templates and using AI-assisted drafting to accelerate narrative summaries.
- Use Claude to run structured risk prompts against live project schedules, identifying misalignments between scope and timeline before they escalate; reduced delivery delays by 20% across managed workstreams.
- Maintain complete PMO documentation repositories including meeting minutes, status reports, risk logs, and change records; ensure all artifacts reflect the latest information and align with PMO Ways of Working.
- Partner with SCRUM masters on Agile and Product Model projects to track high-level milestones, budgets, and resources; facilitate sprint ceremonies and keep executive views in sync with team-level execution.
- Lead stakeholder requirements gathering across global time zones, using prompt chaining with Claude to pre-structure clarifying questions and ensure project scope stays connected to intended business outcomes.
- Received multiple ECE Awards and a Spot Award (2023) for high-impact delivery across data and AI-driven project workstreams.

Business Intelligence Analyst | *TE Connectivity via Bellfast Management Pvt Ltd, Bengaluru, India*

Feb 2023 - Nov 2023

- Designed and delivered 20+ Tableau and Power BI dashboards for the global ISC team tracking KPIs across sales, inventory, and billings; reduced manual reporting effort by 30%.
- Collaborated with cross-regional stakeholders to translate operational data into decision-ready insights, directly influencing resource and inventory planning at a global level.
- Maintained reporting artifact repositories and ensured all dashboards and data sources reflected up-to-date information for leadership reviews.

Business Development / BI Analyst (Apprenticeship) | *TE Connectivity, Bengaluru, India*

Feb 2023

- Served as a core member of the global ISC team, building Tableau, Power BI, and advanced Excel dashboards to display critical KPIs including sales, inventory, and billing trends for senior leadership.
- Created Excel-based pipeline trackers to monitor conversion metrics for early-stage business initiatives; outputs were used directly in leadership reviews to inform go/no-go decisions.

LEADERSHIP & EMPLOYEE ENGAGEMENT

Employee Engagement Lead | *TE Connectivity, Team of 70-80*

Ongoing

- Organize team-building sessions, workshops, and events to strengthen collaboration and morale across a 70–80-person team; recognized for measurably improving team cohesion and inclusion.

EDUCATION

Bachelor of Engineering (B.E.) - Computer Science & Engineering

Global Academy of Technology | Graduated 2021 | CGPA: 8.0
